

TIPS: COMMENDATIONS & RECOMMENDATIONS

- Avoid jargon; use full names of courses/programs, few abbreviations. Be consistent in terms, e.g., faculty, administration.
- Verify the facts before writing either a commendation or recommendation.
- Document each commendation and recommendation with at least two of the following references and others as appropriate. Suggested order:
 - Will the action plan steps enhance student learning?
 - School Report, pp...
 - Conference with "whom" (not individuals but groups, i.e., administration, faculty, staff, English department, math department, classified staff, students, parents)
 - Observation of "what"
 - Other possible references: WASC criteria, other criteria used by the school in the self-study, school publications, courses of study, etc.
- When writing recommendations: Avoid the use of "continue to" and verbs such as "consider, study explore," etc.
- Seek quality not quantity of recommendations. A question Visiting Committee members should ask themselves: *Would the implementation of an effective solution to this recommendation enhance student learning and improve the quality of the educational programs of the school?*
- Reference (using an asterisk or other notation) the commendations and recommendations that support the major commendations and recommendations.

SUGGESTED WORDS FOR COMMENDATIONS AND RECOMMENDATIONS

accelerate	begin
accept	broaden the scope
achieve	build
acquire	
add	calculate
adhere	choose
adjust	clarify
administer	communicate
adapt	compare
adopt	compose
